

Picture Book Learning

Explore the **fun** and **knowledge** within children's picture books!

Picture Book Learning was created to enhance **children's education** by inviting them to use their favorite picture books to master early elementary concepts. The twenty-five **Picture Book Learning Skill Sheets** in Volume 1 focus on key language arts skills such as comprehension, sentence writing, nouns, verbs, synonyms, antonyms, compound words, and many others. The ready-to-use skill sheets and recommended lessons will teach or reinforce the concepts with the assistance of **popular children's stories**.

Picture Book Learning Skill Sheets were originally designed to be used by **teachers** to strengthen a curriculum and provide challenging activities for students with varying levels of language arts abilities. The Skill Sheets have been extremely successful in the classroom, and have also proven to be very useful for **parents** looking to help their children outside of school. With the use of these Skill Sheets in either the **classroom** or **home environment**, teachers and parents can help children reach a higher level of academic achievement.

The mission of Picture Book Learning is to help children enjoy the learning process, which will create the desire to continuously learn and grow. With this desire, the possibilities are endless.
